

An aerial photograph of a vast, green agricultural landscape. A dirt road runs diagonally from the bottom right towards the top right. The fields are lush green, with some rows of crops visible. In the distance, there are rolling hills under a blue sky with light clouds. The overall scene is bright and open.

**NURSERY INDUSTRY ACCREDITATION
SCHEME, AUSTRALIA (NIASA)**

NIASA is an independently audited best management practice program for production nurseries and growing media manufacturers.

Forming the core of a suite of programs NIASA has been trusted for over 25 years. Today the risks around sourcing plant stock are increasing; plant health and biosecurity, true to type and social licence issues, to name a few. However sourcing your plant stock from a professional NIASA accredited nursery is a clear sign that you are managing your risk in plant sourcing.

OMNIA SPECIALITIES AUSTRALIA

The people at Omnia Specialities Australia are passionate about soil and plant health. They are leaders in the development and manufacture of specialty fertilisers and biostimulants including Humates, Fulvates and Kelp products. Omnia Specialities has been manufacturing humate soil conditioners and fertilisers in Australia since 1990. Only the best quality leonardite is used in the specialised process, yielding the most concentrated humic acids in the world.

Our team of Specialist Agronomists cover all areas of Australia and key international markets. Their focus is always finding solutions to improve yield and quality through the Omnia range of products.

**Knowledge grows****Improving productivity
needn't cost the earth.**

Quality nitrate fertilisers from Yara can optimise the yield and quality of crops without costing the earth. We've already reduced the carbon footprint of our nitrate fertiliser production by 40% by making our production plants and processes among the most energy-efficient in the world. Our ongoing development of 'green' ammonia technology and climate-smart agricultural practices means we're on track to reduce emissions by another 30% within a decade and carbon neutral by 2050.

Organic Crop Protectants

For over 30 years OCP has been at the forefront of Organic Farming, producing products that support innovative growers who realise that the old conventional approach to crop production no longer meets the expectations of today's customers and consumers

Today, Certified Organic farming practices have morphed into what we now consider progressive or modern farming. Certified Organic farming is booming and its growth is being fuelled by the mainstream adoption of Regenerative Agriculture, Sustainable Farming and Carbon Farming.

The OCP team is proud to continue our tradition of supporting all sides of the sustainability value chain and excited to continually develop innovative products and modern agronomic principles to help our growers meet the business challenges of today and beyond.

SYNGENTA

Syngenta is a leading science based agtech company that has been proudly supporting Australian agriculture for more than 90 years. We accelerate our innovation and invest to advance a more sustainable agriculture which is good for nature, farmers and society.

Our work helps Australian farmers face the challenges of today's changing world and make better use of available natural resources to safely and sustainably grow food, feed and fibre for the world's growing population.

We invest over \$1.4 billion per year in research and development and leverage the best of our global technology portfolio to deliver Australian growers unrivalled crop solutions. Our crop protection products, seed varieties, and seed care along with agronomic insights and product stewardship support, provides Australian farmers integrated solutions to achieve new levels of productivity and performance.

Syngenta looks forward to continuing to work closely with Australian growers to deliver the innovative solutions required to bring plant potential to life.

UPL AUSTRALIA

The fifth largest agrochemical company in the world, after the acquisition of Arysta LifeScience, UPL is a global leader in global food systems.

The new UPL offers an integrated portfolio of both patented and post-patent agricultural solutions for various arable and specialty crops, including biological, crop protection, seed treatment and post-harvest solutions covering the entire crop value chain.

With a revenue of US\$6.2 billion, UPL is now present in 130+ countries.

We have market access to 90% of the world's food basket and are focused on ushering growth and progress for the complete agricultural value chain including growers, distributors, suppliers and innovation partners.

The new UPL is a solutions company. It's about what we can do with our customers, with farmers, with the whole network to drive world agriculture to the next level.

**BUILT FOR
THOSE WHO GO**

**BEYOND THE
ORDINARY**

**ALL THE POWER YOU NEED**

Get all the power you need from our T2 and FT4 6 cyl. engines, featuring 114 kW (155 hp) of engine power and 92 kW (125 hp) of PTO power.

COMFORT IN NEED

With plenty of options, the 6MH can provide your ideal operating environment. Car-like noise levels and 310° of visibility make this tractor ideal for high-hour users.

CHOICE OF TRANSMISSIONS

Choose between our renovated PowrQuad™ Plus, AutoQuad™ Plus and CommandQuad™ Plus transmissions. For extra slow applications, add an optional creeper for speeds as low as 72 m/h.

TRUE HIGH CROP

Featuring a rear drop axle, the 6155MH can provide up to 680 mm of drawbar ground clearance, making it ideal for use with bedded and high value crops.

COLES COLLECT

Coles Collect is Coles' internal transport company which provides Australian growers with new, sustainable options to transport their fresh produce from the farm to distribution centres, markets or ripening facilities. Supported by 40 transport partners across the country, Coles Collect provides growers with road, rail, and sea freight options for their fresh produce. The Coles Collect team is passionate about providing unique and tailored transport solutions for fresh produce growers to help reduce their weekly freight bills. A key sustainability benefit of Coles Collect is its operating "backhaul" model whereby a truck picks up fresh produce from a grower's farm after returning from a separate delivery to a Coles supermarket. Not only does this provide a cost-effective solution for growers and reduce operating costs, but importantly it lowers the carbon footprint by removing kilometres on the road.

SOURCE CERTAIN INTERNATIONAL

At Source Certain we use established scientific technology to determine the provenance of vegetables through various chemical profiling methods. The sensitivity of our technology allows us to determine a product's provenance beyond a farm to its lot, orchard or shed.

We identify a unique fingerprint between a food product and its origin so that its authenticity and provenance can be scientifically verified at any point in the supply chain.

Our service is legally recognised as a forensic examination tool and can integrate with digital traceability systems to protect the value of your produce within domestic and international markets.

ORGANIC CROP PROTECTANTS PTY LTD

For over 30 years OCP has been at the forefront of Organic Farming, producing products that support innovative growers who realise that the old conventional approach to crop production no longer meets the expectations of today's customers and consumers

Today, Certified Organic farming practices have morphed into what we now consider progressive or modern farming. Certified Organic farming is booming and its growth is being fuelled by the mainstream adoption of Regenerative Agriculture, Sustainable Farming and Carbon Farming.

The OCP team is proud to continue our tradition of supporting all sides of the sustainability value chain and excited to continually develop innovative products and modern agronomic principles to help our growers meet the business challenges of today and beyond.

Find out more

COREX AUSTRALIA

Corex is the exclusive manufacturer of Corflute®, a waterproof twin-wall polypropylene sheet used broadly across the horticulture industry.

We design and produce bespoke trays, boxes and ICB's suitable for wet and dry environments.

Corex products are created to be reused again and again. When your packaging is ready to retire, we can recycle it, and reuse it at Corex Plastics.

Made in Australia and designed for the circular economy.

Check out our new website for some inspiration.

PACKAGING FOR A CIRCULAR ECONOMY

Adopting a circular economy model in fresh produce packaging is more than just efficient waste management. It is also about creating a product that is manufactured sustainably, where resources such as water and energy consumption are considered. It is packaging that is eco-designed which includes recycled content, yet still performs to keep the contents unspoiled. Furthermore, it includes a recycling solution for end of life, so that the process can begin again. StyroPak® made from expanded polystyrene (EPS) does all of this, and more. Other benefits include;

- 100% RECYCLABLE
- CONTAINS RECYCLED MATERIAL
- HIGH SHOCK ABSORPTION
- SUPERIOR HYGIENE
- ASSISTS VITAMIN C RETENTION
- EXCELLENT THERMAL PERFORMANCE

FOAMEX
EST-1982

StyroPak available for order in South Australia only. Recycling arrangements for clean EPS boxes is available nationally.

**NURSERY INDUSTRY ACCREDITATION
SCHEME, AUSTRALIA (NIASA)**

NIASA is an independently audited best management practice program for production nurseries and growing media manufacturers.

Forming the core of a suite of programs NIASA has been trusted for over 25 years. Today the risks around sourcing plant stock are increasing; plant health and biosecurity, true to type and social licence issues, to name a few. However sourcing your plant stock from a professional NIASA accredited nursery is a clear sign that you are managing your risk in plant sourcing.

Sourcing plants? Are YOU at risk?

Plant Sourcing Risk Checklist

- Are you confident the plants are produced under high health conditions?
- Are the plants true to type?
- Does the grower use environmentally sustainable business practices?
- Does the grower use and store agrochemicals appropriately?
- Has the grower assessed their water use?
- Does the grower manage their WHS responsibilities?

For over 25 years NIASA has been the mark of a professional production nursery. Independently and professionally audited, so you don't have to.

Reduce YOUR risk by sourcing from a NIASA accredited production nursery.

For NIASA accredited nurseries and further information

NURSERY INDUSTRY ACCREDITATION SCHEME, AUSTRALIA (NIASA)

NIASA is an independently audited best management practice program for production nurseries and growing media manufacturers.

Forming the core of a suite of programs NIASA has been trusted for over 25 years. Today the risks around sourcing plant stock are increasing; plant health and biosecurity, true to type and social licence issues, to name a few. However sourcing your plant stock from a professional NIASA accredited nursery is a clear sign that you are managing your risk in plant sourcing.

SOURCE CERTAIN INTERNATIONAL

At Source Certain we use established scientific technology to determine the provenance of vegetables through various chemical profiling methods. The sensitivity of our technology allows us to determine a product's provenance beyond a farm to its lot, orchard or shed.

We identify a unique fingerprint between a food product and its origin so that its authenticity and provenance can be scientifically verified at any point in the supply chain.

Our service is legally recognised as a forensic examination tool and can integrate with digital traceability systems to protect the value of your produce within domestic and international markets.

APPLIED HORTICULTURAL RESEARCH

Applied Horticultural Research is a multi-disciplinary team of skilled research and communication professionals. Our research, communications and training supports innovation and sustainability in the horticultural supply chain — from farm to consumer. We work closely with growers, processors and support organisations in Australia and overseas, to deliver better products to consumers, and returns to growers. AHR has strong skills in science-based product and systems development, and a track record of helping growers meet consumer demands and increase profits.

SYNGENTA

Syngenta is a leading science based agtech company that has been proudly supporting Australian agriculture for more than 90 years. We accelerate our innovation and invest to advance a more sustainable agriculture which is good for nature, farmers and society.

Our work helps Australian farmers face the challenges of today's changing world and make better use of available natural resources to safely and sustainably grow food, feed and fibre for the world's growing population.

We invest over \$1.4 billion per year in research and development and leverage the best of our global technology portfolio to deliver Australian growers unrivalled crop solutions. Our crop protection products, seed varieties, and seed care along with agronomic insights and product stewardship support, provides Australian farmers integrated solutions to achieve new levels of productivity and performance.

Syngenta looks forward to continuing to work closely with Australian growers to deliver the innovative solutions required to bring plant potential to life.

Innovation that's grounded.

SYNGENTA HAS BEEN BRINGING GLOBAL AGRICULTURAL INNOVATION TO AUSTRALIA FOR MORE THAN 100 YEARS.

Our world-class seed varieties and crop protection products help farmers overcome climatic challenges and sustainably grow more food, feed and fibre.

Our Good Growth Plan's commitments to accelerating innovation, enhancing biodiversity and soil health, and helping people stay safe and healthy are an investment in the sustainability of agriculture and our business.

Visit syngenta.com.au/the-good-growth-plan to see how we are working towards a better future.

COREX AUSTRALIA

Corex is the exclusive manufacturer of Corflute®, a waterproof twin-wall polypropylene sheet used broadly across the horticulture industry.

We design and produce bespoke trays, boxes and ICB's suitable for wet and dry environments.

Corex products are created to be reused again and again. When your packaging is ready to retire, we can recycle it, and reuse it at Corex Plastics.

Made in Australia and designed for the circular economy.

Check out our new website for some inspiration. corex.com.au

SPECIALISED VEGETABLE MACHINERY AND GROWING EXPERTISE FROM **THE GROUND UP**

The right tools for the job, comprehensive support, and expertise to keep your business growing.

To improve yield and profitability you need specialised tools, and the best advice and back-up. At Landpower Vegetable Centre we provide a full range of vegetable cultivation, separating, harvesting, handling, transportation and preparation equipment from GRIMME, SPUDNIK and ASA-LIFT to support you and provide better harvest outcomes.
